

Please reject the NAB's petition 04-160 and allow XM radio to continue broadcasting Instant Traffic and Weather. This is an invaluable service that allows you to hear instantly where traffic tie-ups are. This is unlike public channels where you wait until they're ready to broadcast information and you might be too late to avoid the tie-up. I have only had my XM for about 6 weeks but I have avoided at least 3 major tie-ups. Please don't allow the NAB to take away this valuable service.
